### **DETAILED ACTION**

1. Please note that there was a typo error in the 102 rejection of the previous Office action. The rejection stated claims 1-6, 17, and 19. However, it should have been 1-6, 8-17, and 19. The error has been corrected in this office action.

#### ***Election/Restrictions***

2. This application contains claims 20-25 drawn to an invention nonelected with traverse in Paper filed October 25, 2004. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

#### ***Claim Objections***

3. Claim 18 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 18 depends from canceled claim 13.

#### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 2, 6, 8, 10, 12, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Chien et al (US 5,891,114).

Chien discloses a catheter including a proximal and distal braid section with continuous wires (figs. 7-8, column 13, lines 55-57, and column 14, lines 55-56) where the distal cross-sectional area of the wires is less than the proximal cross-sectional area.

***Allowable Subject Matter***

6. Claims 7 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

7. Applicant's arguments filed April 4, 2005 have been fully considered but they are not persuasive.

8. Applicant's arguments are narrower than the claims. Chien contains at least two braided wires as seen in the figures 7-8. With respect to applicant's arguments that figure 7 of Chien do not meet with a change in cross sectional area of each of the continuous wires extending through the distal and proximal braid section, the examiner disagrees because this limitation has not been claimed. Chien includes all the elements as claimed.

***Conclusion***

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3763

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
